## Product Description

ASTM 201 Stainless Steel Coil 1250mm Width Thickness 1mm Cold rolled 2B Bright Color Construction Industry

### Product Description

In many cases, 201 stainless steel coil requires very hard materials to complete some work quickly. Therefore, the good impact resistance of 201 stainless steel coil makes it tough even in cold conditions.

Moreover, compared to 301 stainless steel, its toughness is 30% higher.

Meanwhile, it can also maintain good ductility. Therefore, designers can reduce the weight of products by using 201 stainless steel. Thus, many designers like it.
