Product Description

SUS 410 Stainless Steel Coil 1800mm Width Thickness 2.5mm Cold rolled Natural Color Industry Use

Product Description

After screen printing 410 stainless steel, people spray pigment particles on the surface of 410 stainless steel. And then, the pear skin pattern appears on the surface of 410 stainless steel.

Therefore, the above two methods increase the aesthetics of 410 stainless steel.

As for the technological process is: stainless steel product → silk screen → etching → alkali treatment → silk screen → oxidation coloring → alkali treatment → finished product.

These processes make 410 stainless steel have more forms and surface treatments than any other products.
