

6mm Thick 1 Inch Stainless Steel Strip Tubing 8K JIS 20mm Width

Our Product Introduction

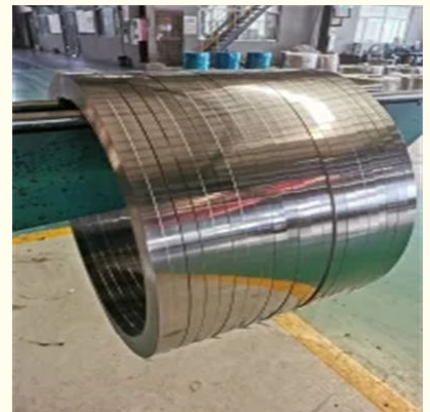

Basic Information

- Place of Origin: Jiangsu
- Brand Name: Hailian
- Model Number: 201
- Minimum Order Quantity: 1 ton
- Price: Negotiation
- Packaging Details: Standard seaworthy packing
- Delivery Time: 3 - 5 work days
- Payment Terms: L/C, T/T
- Supply Ability: 10000 ton per month

Product Specification

- Name: SS201 Stainless Steel Strip
- Grade: 201
- Thickness: 6mm
- Type: Strip
- Surface: BA
- Size: Customized
- Color: Silver White
- Application: Container Material
- Standard: JIS
- Technique: Cold-rolled
- Highlight: 6mm Stainless Steel Strip,
Stainless Steel Strip 8K,
1 Inch Stainless Steel Tubing JIS

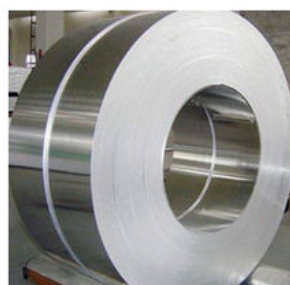

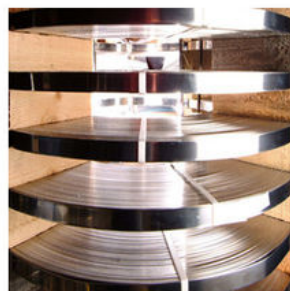

Product Description

SS304 SUS BA Stainless Steel Strip 6mm Thickness 20mm Width Cold Rolled White Sliver Natural Surface
SS201 JIS BA Stainless Steel Strip 6mm Thickness 20mm Width Cold-Rolled White Sliver Color Natural Surface

Product Description

Stainless steels are steels with a minimum of 10.5% chromium. They gain their resistance to corrosion from a thin, tenacious surface layer of chromium oxide. If the oxide layer is physically damaged there is rapid regeneration of the layer, thus preserving the corrosion resistance. 304 stainless steel strip and slit to width coil, ASTM-666, is similar to Type 302, but has a maximum carbon content of 0.08%. This material has an excellent combination of corrosion resistance and formability. 304 is also known as 18/8 chrome-nickel, austenitic, stainless strip. It is a versatile alloy that welds well without filler. It's commonly used in stampings and drawn parts. It's non-magnetic in the annealed state and become magnetic with work hardening. Gibbs Interwire stocks Type 304 annealed stainless strip in gauges from 0.0053" and 304 tempered strip in gauges from .0019". 304 stainless steel strip is slitted by 304 stainless steel coil through cutting machine, and it has various application in our daily life, like seals, gaskets, precision parts, exhaust pipes, boiler drums, etc. 304 Stainless Steel Strips are most common steel product used in many industries due to their silent attributes like excellent thermodynamic and good electromagnetic properties. Our precision stainless Strip have better performance of corrosion resistance and broadly used in many appliances, because they can be formed into any required shapes. Xino Steel supply these SS Strips to various industries including chemical, electrical, food processing, pharmaceuticals, petrochemicals, and cement & gas industries. All the products are manufactured according to Indian as well as international standards. Compared to normal cold rolled stainless strip, hot rolled stainless steel strip, the precision stainless steel strip need more process flow, the main important step is Tension Annealing (TA line), size tolerance control, so the precision always higher labor costs and value, also with higher technology requirement, experience, equipment. In China before 2015, most of the precision equipment was imported from Germany, Japan, Italy, and other countries, now China also can manufacture part of them with high quality and satisfying performance. **304 steel strip**: has good corrosion resistance, heat resistance, low temperature strength and mechanical properties, good hot workability such as stamping, bending, and no heat treatment hardening. Uses: tableware, cabinets, boilers, auto parts, medical appliances, building materials, food industry (use temperature -196°C-700°C), 304 stainless steel is a universal stainless steel material, anti-corrosion performance is better than 200 series stainless steel materials Be strong. The high temperature resistance is also better, which can reach 1000-1200 degrees. 304 stainless steel strip is slitted by 304 stainless steel coil through cutting machine, and it has various application in our daily life, like seals, gaskets, precision parts, exhaust pipes, boiler drums, etc. 304 Stainless Steel Strips are most common steel product used in many industries due to their silent attributes like excellent thermodynamic and good electromagnetic properties. Our precision stainless Strip have better performance of corrosion resistance and broadly used in many appliances, because they can be formed into any required shapes. Xino Steel supply these SS Strips to various industries including chemical, electrical, food processing, pharmaceuticals, petrochemicals, and cement & gas industries. All the products are manufactured according to Indian as well as international standards.

Product Properties

Grade	201/202/301/303/304/304L/316/316L/321/310S/401/409/410/420J1/420J2/430/439/443/444/2205/2507
Surface Finish	2B, BA, NO.1, NO.4, 8K, HL, Embossing, Satin, Mirror, ect
Standard	JIS/SUS/GB/DIN/ASTM/AISI/EN

Technique	Cold Rolled; Hot Rolled
Thickness	0.3-4mm cold rolled; 3-16mm hot rolled; Customized according to customer requirements
Width	10-600mm
Application	Interior/Exterior decoration; Architectur; Evevator; Kitchen; Ceiling; Cabinet; Advertising nameplate; Roof structure; Shipbuilding
Lead Time	7-15 working days after the receipt of 30% deposit
Payment Terms	30% TT for deposit,70% TT /70% LC at sight balance before shipment
Price Terms	FOB, EXW, CIF, CFR
Packing	Wooden Pallet or according to customer's requirements

Company Profile

Shandong Hailian Steel Group has deeply engaged in Chinese domestic market for over 10 years. We established perfect reputation and deep co-operations with large number of reliable patners. Our high-tech factory and well-trained workers are able to manufature best quality and highly customized metal products. The professional sales team guarantes the prefect trading experience with Hailian.

The goal of Hailian is doing our best to offer our clients best service and product quality with lowest price. We are looking forward to deal business with you!

Our company is willing to provide our copies of company registration certificate and Chinese exporting registration for you to view. These certificates are under Chinese Trading Law effect. They can help you officially check our company s capability and status.

FAQ

1.Is customization available?

Our factory's expert equipment and highly-trained workers are capable of manufacturing highly customized products. Please fel free to discuss with us about your customized requirements, we can surely meet your needs.

2.Which payment method can I choose?

Our company accepts all types of secured payment methods. Bank transaction, Trading Assurance, Paypal and etc are all available from us. Please feel free to contact us about your preferred payment method.

3.Is sample providing service available?

Our company provides free samples to our clients. We usually also cover the sample shipping cost. Please feel free to order a sample from us.
