Product Description

310S Stainless Steel Channel Beam / Bar ASTM 80 * 43 * 5 mm Hot Rolled No.1 Surface Chemical Use Bright Color

Product Description

Stainless steel beams are named after their most prominent aspect of the 'I' Shape. The I-beam is the universal and most identified model and because of that, the other beams are named comparatively to that bar. The most common beam in our inventory. The I-beams center web can only be rolled as much as a mill's equipment can handle ($5/8"$). The I-Beam is lighter in weight which is why it is used so often. The I-Beam is also a solid piece of metal throughout. It is rolled and manufactured from one part.
