### Product Description

The slitters developed and produced by Hailian are widely used in the slitting and processing of various metal plates. Among them, common galvanized steel sheets, especially galvanized steel sheets, can be processed into the galvanized coils of the specifications that they want through the unwinding, leveling, slitting, and winding of the production line of the gold-blade slitter. Of course, according to the different characteristics of the galvanized steel sheet, there will be different design requirements parameters for the sliver slitter.
