

## ASME 316 Stainless Steel Banding Slit Coil 200mm Width 5mm Thick

### Our Product Introduction

#### Basic Information

- Place of Origin: Jiangsu
- Brand Name: Hailian
- Model Number: 201
- Minimum Order Quantity: 1 ton
- Price: Negotiation
- Packaging Details: Standard seaworthy packing
- Delivery Time: 3 - 5 work days
- Payment Terms: L/C, T/T
- Supply Ability: 10000 ton per month

#### Product Specification

- Name: SS201 Stainless Steel Strip
- Grade: 201
- Thickness: 5mm
- Type: Strip
- Surface: BA
- Size: Customized
- Color: Bright
- Application: Construction Material
- Standard: ASME
- Technique: Cold-rolled
- Highlight: **ASME 316 Stainless Steel Banding, 316 Stainless Steel Banding 200mm, Stainless Steel Slit Coil**

## Product Description

SS201 BA Stainless Steel Strip ASME 5mm Thickness 200mm Width Cold-Rolled Bright Color Natural Surface

### Product Description

Stainless steel strips are widely used in the sectors of special requirements such as button battery, welding pipe, stainless steel flexible hose, stamping part, tact switch, engine gasket, spring gasket, gas filter lid, hypodermic needle and tower metal random packing components. Stainless steel strip is a common mill form of stainless steel and is typically stocked in three types: heat-treatable, non-heat-treatable and pre-hardened. Stainless steel strip is formed to fit desired applications through processes such as slitting, edging, annealing, shearing, polishing, tempering and additional custom finishing. Most typically made into coil, stainless steel strip can also be made into shapes such as channels, frames, trim and angles. 201 stainless steel, has a certain acid resistance, alkali resistance, high density, polishing no bubble, no pinhole and other characteristics, is the production of all kinds of watchcase, watchband bottom cover quality materials.

Mainly used for decorative pipe, industrial pipe, some shallow stretching products. 201 Stainless steel strip Price in China, Manufacturer of 201 Stainless Steel strip. The disadvantage of this series of materials is: below 18% chromium content and low nickel content can not reach balance and form ferrite, for this reason, 200 series of stainless steel chromium content to 13.5% ~ 15%, in some cases down to 13% ~ 14%, its corrosion resistance is not compared with 304 and other similar steels.

In addition, manganese and, in some cases, copper reduce the effect of re-passivation under acidic conditions common in the corrosion sites of deposits and crevasses.

The destruction rate of 200 series steels under these conditions is approximately 10-100 times that of 304 stainless steels.

The residual sulfur and carbon content of these steels is often not controlled during production, and the material cannot be traced to its source, even when it is recycled.

If Cr-Mn steels are not specified, they can become a dangerous scrap mix, resulting in castings containing unexpectedly high levels of manganese.

### Product Properties

Product Name	Stainless Steel Strip
Material	201, 202, 301, 302, 304, 304L, 310S, 316, 316L, 321, 430, 430A, 309S, 2205, 2507, 2520, 430, 410, 440, 904Lect, Or Customized
Thickness	0.1-20 mm /Customized
Length	as requirement
Width	1000-6000 mm or as requirement
Standard	ASTM, JIS, GB, AISI, DIN, BS, EN

Payment terms	T/T , L/C
MOQ	1Ton

### Company Profile

Shandong Hailian Steel Group has deeply engaged in Chinese domestic market for over 10 years. We established perfect reputation and deep co-operations with large number of reliable partners. Our high-tech factory and well-trained workers are able to manufacture best quality and highly customized metal products. The professional sales team guarantees the perfect trading experience with Hailian.

The goal of Hailian is doing our best to offer our clients best service and product quality with lowest price. We are looking forward to deal business with you! Our company is willing to provide our copies of company registration certificate and Chinese exporting registration for you to view. These certificates are under Chinese Trading Law effect. They can help you officially check our company's capability and status.

### FAQ

1.Which payment method can I choose?

Our company accepts all types of secured payment methods. Bank transaction, Trading Assurance, Paypal and etc are all available from us. Please feel free to contact us about your preferred payment method.

2.Is sample providing service available?

Our company provides free samples to our clients. We usually also cover the sample shipping cost. Please feel free to order a sample from us.

3.What products and materials do you supply?

Our company mainly supplies all catalogs and all grades of steel and stainless steel products. Coils, strips, sheet, pipes, bars, beams, flanges and other customized products. Tin coating, Ti coating, galvanization and other surface treatments are also available.

Other than steel products, we also have high production capacity and hold large ready stock of all kinds of copper and aluminum products. Please feel free to consult us about any related products above, we can surely meet your requirements.
