Product Description

Copper Sheet T2 Standard ASME Thickness 0.4mm Construction Use Bright Surface Golden Color

Product Description

Copper sheeting may be more expensive than other types of rolled sheet metal, such as steel or aluminum. But its price is competitive when compared to creating a tile backsplash, with its layers of tile and cement board, thinset, grout, and grout sealer. By contrast, a copper sheet backsplash requires little more than copper sheeting, a backing board, contact cement, and staples.
