## Product Description

Galvanized Steel Coil DC51D Hot-Dipped Manufacturing Process JIS Standard 1219mm Width 0.2mm Thickness Building Use

### Product Description

A large number of galvanized thin coils are used in automobile manufacturing, refrigerator, construction, ventilation and heating facilities and furniture manufacturing. Zinc plating has become an important method of steel corrosion prevention, not only because zinc can form a dense protective layer on the surface of steel, but also because zinc has a cathodic protection effect, when the zinc layer is damaged, it can still prevent the corrosion of iron base metal through cathodic protection.
