Product Description

AISI 201 Stainless Steel Channel Beam No.1 Surface 5mm Thick Steel Beam Dark Color Industry Use

Product Description

Stainless steel beams are designed in a specific way to achieve the shape they have. The way the beams are designed is by welding flat pieces of metal atop the strong supportive center. Stainless steel beams are named after their most prominent aspect of the 'I' Shape. The I-beam is the universal and most identified model and because of that, the other beams are named comparatively to that bar.
