## Product Description

Alloy Steel Pipe 12CrMoVG Steel Pipe 12mm Thick ASME Hot Rolled Large Diameter 219mm OD

### Product Description

Bimetallic combination tubing has higher resistance to corrosion in comparison with carbon steel pipe and has cost superiority in comparison with diphase stainless steel and nickel-based alloy steel. Thus it is widely applied in the oil and gas industry and has very high cost performance especially under high chloride corrosion environment conditions. In the light of different corrosion environments, there are SSC-resistant tubing and casing, CO<sub>2</sub>-resistant tubing and casing, and tubing and casing that can resist SSC, chloride, and carbon dioxide.
