Product Description

Mild Steel is the most common steel used and is the least expensive among other steel products. Mild Steel also known as "low carbon Steel" is a type of steel which contains a smaller percentage of carbon and is strong and easily worked but not readily tempered or hardened. Mild Steel is hard, durable, weldable, and it rusts easily because it is used in every type of product which is created from steel. Automobile chassis, cookware, motorcycle components are some of the components which are made using Mild Steel.
