Product Description

Copper Sheet Plate T1 Grade GB Standard 1500 * 6000mm Size 2mm Thickness Industry Material

Product Description

Copper sheet is a very workable and malleable form of metal, high in electrical and thermal conductivity, and provides excellent corrosion resistance. A beautiful and versatile metal, copper has been utilized for thousands of years. Historically, it served as a favorite choice in making tools, vessels, sculptures, and jewelry. Copper is also known for its beautiful patinas. When exposed, unsealed, to an outdoor environment, copper begins to oxidize. This exposure creates beautiful color variations in the form of a patina.
