

DX51D Galvanized Steel Coil 270 - 500n/Mm2 Surface Treatment

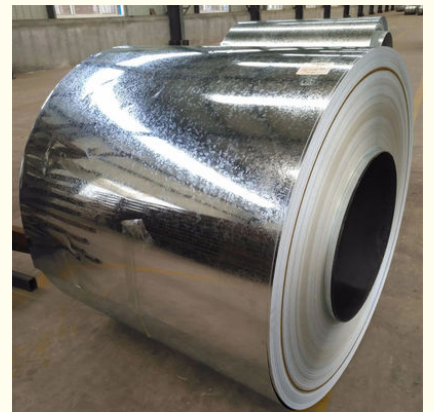

Basic Information

- Place of Origin: wuxi
- Price: Negotiation

Product Specification

- Tensile Strength: 270-500n/mm2
- Package: Standard Export Package
- Edge Quality: No Burrs
- Zinc Coating: 30-275g/m2
- Length: According To Customer's Requirement
- Yield Strength: 175-400n/mm2
- Coil ID: 508/610mm
- Surface Quality: Bright And Smooth Surface
- Highlight: **Galvanized Steel Coil 270n/mm2, Surface Treatment Galvanized Coil**

Product Description

Product Description:

Galvanized Steel Coil

Galvanized Steel Coil, also known as GI Coil, GI Steel Coil or Zinc Steel Coil Sheets, is a type of steel coil made by hot-dip galvanizing process, where the steel is immersed in a molten zinc bath to ensure a tough, uniform coating. It has excellent corrosion resistance, formability, weldability and paintability properties. It is widely used in construction, automotive, agricultural, and other industrial applications.

The Galvanized Steel Coil has a zinc coating of 30-275g/m², yield strength of 175-400n/mm², and an elongation of 16-30%. The coils come with an inner diameter of 508/610mm and length according to customers' requirement.

The Galvanized Steel Coil offers superior corrosion resistance and long-lasting performance. It is easy to weld and form, making it suitable for a wide range of applications. It also has excellent paintability and is highly durable.

Applications:

Galvanized Steel Coil originating from Wuxi is a high-strength steel sheet with a bright and smooth surface. It is made of galvanized steel with a yield strength of 175-400n/mm². The coil weight of this product ranges from 3-8 tons and the width from 1000-1500mm. It is a great choice for applications that require an anti-corrosive and decorative finish. DX53D GI Coil and DX52D GI Coil Sheets are especially popular for their excellent performance in outdoor environments.

Apart from outdoors, galvanized steel coil can also be used for indoor applications. It is an ideal choice for areas requiring waterproofing or moisture control. Galvanized steel coil can be used for roofing, wall siding, ceiling panels, window frames, and many other interior applications. It is also suitable for manufacturing industrial containers, ducts, machinery parts, and other related products.

Galvanized steel coil is a cost-effective material that offers high performance and long-lasting durability. It is also eco-friendly and easy to work with, making it the perfect choice for a wide range of projects. Whether you're looking for a product to use indoors or outdoors, Galvanized Steel Coil is an ideal option.

Customization:

Galvanized Steel Coil

Place of Origin: Wuxi, China

Coil ID: 508/610mm

Package: Standard Export Package

Elongation: 16-30%

Surface Treatment: Galvanized

Material: Galvanized Steel

We specialize in **Zinc Steel Coil Sheets**, **Galvanized Steel Coil**, **DX52D GI Coil Sheets** and other **Chinese Steel Manufacturers** products. Our Galvanized Steel Coils are of superior quality and are precisely manufactured to meet the stringent requirements of our customers.

Support and Services:

Galvanized Steel Coil technical support and services include:

Providing comprehensive technical support for the use and application of galvanized steel coils.

Providing quality assurance and testing services for galvanized steel coils.

Providing repair and maintenance services for galvanized steel coils.

Providing warranty and after-sales services for galvanized steel coils.

Packing and Shipping:

Packaging and Shipping

Galvanized steel coils are typically shipped in steel drums or in bundles. The steel drums are usually wrapped with a waterproof material and sealed for protection against moisture and other environmental factors. The bundles are then placed in wooden pallets or metal crates for additional protection and to facilitate loading and unloading during shipping. All shipments should be labeled with the necessary shipping information.

FAQ:

Q1: Where is the Galvanized Steel Coil produced?

A1: Our Galvanized Steel Coil is produced in Wuxi.

Q2: What is the thickness of the Galvanized Steel Coil?

A2: The thickness of the Galvanized Steel Coil varies depending on your needs.

Q3: What is the coating weight of the Galvanized Steel Coil?

A3: The coating weight of the Galvanized Steel Coil varies depending on your needs.

Q4: What is the width of the Galvanized Steel Coil?

A4: The width of the Galvanized Steel Coil varies depending on your needs.

Q5: What is the surface condition of the Galvanized Steel Coil?

A5: The surface condition of the Galvanized Steel Coil can be customized according to your needs.
