Product Description

316/316L Stainless Steel Pipe Tube 27mm OD ASTM AISI JIS Seamless SS Pipes 4mm Thickness

Product Description

ASTM A312 Grade TP316 and TP316L refer to the stainless steel 316 and 316L respectively. The prefix "TP" denotes "type" of the stainless steel. TP316 or TP316L pipes may be furnished in seamless or longitudinally welded types with butt welding ends or threaded ends. TP316 is derived from the classic "18-8" (TP304) stainless steel by adding molybdenum for enhanced pitting resistance in chloride environments. TP316L is the low carbon version of TP316, in which low carbon content improves sensitization for better welded corrosion resistance.
