Product Description

20# AISI1020 Seamless Steel Pipes Chinese Carbon Steel Tubes 114mm OD 6mm Thickness ASME Standard

Product Description

AISI 1020 steel is also known as C1020 steel in cold worked (cold rolled or cold drawn) condition. 1020 carbon steel is one of the most commonly used plain carbon steels, has good machinability and weldability. SAE AISI 1020 mild steel can be hot rolled or cold drawn, but it is usually in turned and polished or cold drawn conditions. Due to its low carbon content, it is resistant to induction hardening or flame hardening.
