

Sliver Color Alloy Wire Rods In Coils For Production Grade G Gauge Standard ISO SGS

Our Product Introduction

Basic Information

- Place of Origin: Shandong
- Brand Name: Hailian
- Certification: ISO
- Model Number: GI Wires
- Minimum Order Quantity: 1 ton
- Price: Negotiation
- Packaging Details: Standard seaworthy packing
- Delivery Time: 3 - 5 work days
- Payment Terms: L/C, T/T
- Supply Ability: 1000 ton per month

Product Specification

- Alloy Or Not: Is Alloy
- Sample: Could Be Provided
- Application: Construction
- Color: Sliver Color
- Diameter: 0.3-10 Mm
- Product Category: Galvanized Steel Wires
- Surface: Bright Surface
- Standard: ISO SGS
- Highlight: **Production Grade Alloy Wire Rods, ISO Alloy Wire Rods, SGS Alloy Wire Rods**

Product Description

Product Description:

The Grade of the Galvanized Steel Wires is determined by the Gauge, which refers to the thickness of the wire. The wires are available in various gauges, from the thinnest 0.3mm to the thickest 10mm. This ensures that there is a wire suitable for any application that requires strength and durability.

Galvanized Steel Wires are available in two thicknesses, 0.8mm and 1mm, making them ideal for a wide variety of applications. The 1mm stainless steel wire is particularly popular due to its strength and resistance to corrosion. This thickness is commonly used for wire fencing, as well as for creating wire sculptures and other art pieces.

These wires are alloyed with zinc, which provides superior protection against rust and corrosion. The zinc layer is applied using a technique called hot-dip galvanization, which involves dipping the wire in a bath of molten zinc. This ensures that the zinc layer is evenly distributed and adheres firmly to the surface of the wire.

The Galvanized Steel Wires are supplied in the form of wire rods in coils, which makes them easy to handle and transport. The coils can be easily unwound to provide the required length of wire, making them ideal for use in construction, manufacturing, and other industries that require large quantities of wire.

In conclusion, Galvanized Steel Wires are a versatile and durable type of steel wire that are available in a range of gauges and thicknesses. They are alloyed with zinc to provide superior protection against rust and corrosion, and are supplied in the form of wire rods in coils for ease of use. Whether you are creating wire sculptures, building a fence, or manufacturing a product, Galvanized Steel Wires are a reliable and cost-effective solution.

Features:

Product Name: Galvanized Steel Wires

Diameter: 0.3-10 mm

Thickness: 0.8mm, 1mm

Grade: Gauge

Product Category: Galvanized Steel Wires

Special Use: Free Cutting Steel

Uses: Ideal for making galvanized wire coil, produced from high quality steel wire rods, can be used for various industrial applications.

Features: Galvanized steel wire provides excellent corrosion resistance, high tensile strength, and durability. It can be easily welded, coated or painted.

Technical Parameters:

Grade:	Gauge
Standard:	ISO SGS
Special Use:	Free Cutting Steel
Product Name:	GI Rods Galvanized Steel Wires ISO SGS 0.8mm 1mm Thickness Round Wire Steel Wire Coils
Shape:	Round Wire
Diameter:	0.3-10 Mm
Technique:	Zinc Layer
Alloy Or Not:	Is Alloy
Thickness:	0.8mm 1mm
Application:	Construction

Applications:

The supply ability of these GI steel wires is 1000 tons per month, and they can be delivered within 3-5 work days. The packaging details include standard seaworthy packing, ensuring safe transportation of the product. The product name is GI Rods Galvanized Steel Wires ISO SGS 0.8mm 1mm Thickness Round Wire Steel Wire Coils. The diameter of the wires ranges from 0.3mm to 10mm, and they are made of an alloy that is resistant to rust and corrosion. The zinc coating on these wires ranges from 15g/m² to 600g/m², ensuring maximum protection against rust and corrosion. The length of these wires is in coil form.

These GI steel wires can be used in a variety of applications, including construction, fencing, and agriculture. They are ideal for making fences, wire mesh, and barbed wire, as they are strong and can withstand harsh weather conditions. They can also be used in construction, such as for reinforcing concrete and for making suspension bridges. In agriculture, they are used for making plant supports and trellises. These GI steel wires are versatile and can be used in many different scenarios.

Overall, Hailian's GI Wires are a high-quality product that is perfect for anyone who needs strong and durable steel wires. Whether you're working in construction, agriculture, or any other industry, these wires are sure to meet your needs. So if you're looking for gi steel wire, steel wire rods, or gi steel coil, look no further than Hailian's GI Wires.

Support and Services:

Our Galvanized Steel Wires product comes with comprehensive technical support and services to ensure optimal performance and customer satisfaction. Our team of experts is available to provide guidance on product selection, installation, and maintenance to meet your specific needs.

In addition, we offer training and education programs to help you better understand the features and benefits of our Galvanized Steel Wires product. These programs cover topics such as safety, reliability, and durability, and are designed to help you get the most out of your investment.

Should you encounter any issues or concerns with our Galvanized Steel Wires product, our technical support team is available to offer prompt and effective solutions. We pride ourselves on providing exceptional customer service, and our team is committed to resolving any problems to your satisfaction.

Packing and Shipping:

Product: Galvanized Steel Wires

Packaging: The galvanized steel wires are packaged in spools or coils, depending on the length and thickness of the wire. The spools are made of high-quality plastic and are designed to keep the wires organized and tangle-free during shipping and storage.

Shipping: The galvanized steel wires are shipped in strong and durable boxes to ensure they arrive at their destination in good condition. The boxes are labeled with the product name, quantity, and other important information to help identify the contents quickly and easily.

FAQ:

Q: What is the brand name of the galvanized steel wires?

A: The brand name of the galvanized steel wires is Hailian.

Q: What is the model number of the galvanized steel wires?

A: The model number of the galvanized steel wires is GI Wires.

Q: Does the galvanized steel wires have any certification?

A: Yes, the galvanized steel wires are certified by ISO.

Q: Where are the galvanized steel wires manufactured?

A: The galvanized steel wires are manufactured in Shandong.

Q: What is the minimum order quantity for the galvanized steel wires?

A: The minimum order quantity for the galvanized steel wires is 1 ton.

Q: Can the price of the galvanized steel wires be negotiated?

A: Yes, the price of the galvanized steel wires is open to negotiation.

Q: What are the payment terms for the galvanized steel wires?

A: The payment terms for the galvanized steel wires are L/C or T/T.

Q: What is the supply ability of the galvanized steel wires?

A: The supply ability of the galvanized steel wires is 1000 ton per month.

Q: What is the delivery time for the galvanized steel wires?

A: The delivery time for the galvanized steel wires is 3 - 5 work days.

Q: What is the packaging details for the galvanized steel wires?

A: The galvanized steel wires are packed in standard seaworthy packing.
