

Customization Seamless/Welded Mild Steel Pipe for Oil and Gas Transportation Carbon Steel Pipes 10-200mm

Our Product Introduction

For more products please visit us on sheetstainless-steel.com

Basic Information

- Place of Origin: Shandong
- Brand Name: Hailian
- Certification: ISO SGS MTC
- Minimum Order Quantity: As request
- Price: Negotiate
- Packaging Details: Standard packing
- Delivery Time: 3 - 5 days
- Payment Terms: Discussed
- Supply Ability: 50000 ton/month

Product Specification

- Type: Seamless/welded
- Size: 22 - 720mm OD
- Standard: GB EN ASTM DIN JIS
- Application: Construction, Machinery, Electronics, Oil, Water, Agriculture Etc.
- Wall Thickness: As Request
- Surface Treatment: Standard (Can Be Oiled Or Painted)
- Package: Standard
- Length: 6m Or As Request
- Highlight: **Carbon Welded Seamless Steel Pipe, 10-200mm Seamless Steel Pipe**

Product Description:

A seamless steel pipe is a type of steel pipe that does not have any welded joints or seams along its length. This type of pipe is known for its uniform structure and high strength, making it ideal for various industrial applications. The seamless steel pipe can be categorized based on different attributes such as type, length, standard, customization, and size.

Type: The seamless steel pipe is available in both seamless and welded types. Seamless steel pipes are manufactured without any welding process, resulting in a smooth and uniform surface. On the other hand, welded steel pipes are made by welding strips of steel together. The seamless type is preferred for its higher strength and reliability.

Length: The standard length for seamless steel pipes is 6 meters. However, these pipes can also be customized to meet specific project requirements. Customers can request seamless steel pipes in lengths other than 6 meters based on their needs.

Standard: Seamless steel pipes are manufactured in compliance with various international standards such as GB, EN, ASTM, DIN, and JIS. These standards ensure the quality, performance, and interchangeability of the seamless steel pipes across different applications. Whether it is 45# carbon steel pipes, 20# seamless steel pipes, or MS pipes Q235, seamless steel pipes are designed to meet these stringent standards.

Customization: Customization options are available for seamless steel pipes to suit specific project requirements. Customers can request customization in terms of length, diameter, material grade, and surface finish. This flexibility allows seamless steel pipes to be tailored for various industrial applications.

Size: Seamless steel pipes are available in a wide range of sizes with an outer diameter (OD) ranging from 22mm to 720mm. The diverse size options make seamless steel pipes suitable for different applications, including fluid transportation, structural support, and machinery manufacturing. Whether it is a small diameter pipe or a large one, seamless steel pipes offer reliability and durability.

Features:

Product Name: Seamless Steel Pipe

Type: Seamless/welded

Package: Standard

Application: Construction, Machinery, Electronics, Oil, Water, Agriculture Etc.

Size: 22 - 720mm OD

Surface Treatment: Standard (Can Be Oiled Or Painted)

Technical Parameters:

Type	Seamless
Application	Construction, Machinery, Electronics, Oil, Water, Agriculture Etc.
Wall Thickness	As Request
Length	6m Or As Request
Customization	Available
Surface Treatment	Standard (Can Be Oiled Or Painted)
Package	Standard
Material	Steel
Size	22 - 720mm OD
Standard	GB EN ASTM DIN JIS

Applications:

20# Seamless Steel Pipes by Hailian are versatile and high-quality products that find application in various industries. Originating from Shandong, these pipes come with certifications such as ISO, SGS, and MTC, ensuring their reliability and performance. With a minimum order quantity tailored to meet specific needs and negotiable pricing, Hailian offers flexibility to customers.

These pipes are suitable for a wide range of applications, including construction, machinery, electronics, oil, water, and agriculture, among others. Their seamless construction and adherence to GB, EN, and ASTM standards make them a preferred choice for projects requiring durability and precision.

Customers can request different wall thicknesses based on their requirements, and the pipes come with standard surface treatment that can be further customized with oiling or painting. The seamless/welded type provides options for different project needs, while the material - steel - ensures strength and longevity.

With a supply ability of 50000 tons per month, Hailian ensures timely delivery within 3-5 days, meeting urgent project timelines. The packaging details follow standard practices to protect the pipes during transportation and storage.

Payment terms are open for discussion, providing flexibility to customers. Whether for large-scale industrial projects or smaller applications, Hailian's 20# Seamless Steel Pipes offer a reliable solution backed by a reputable brand and certifications.
